Copyright of the articles to which records in this database refer is held by the publishers listed in the PUBLISHER (PB) field (available for records published or updated in Chemical Abstracts after December 26, 1996), unless otherwise indicated in the original publications.

FILE COVERS 1967 - 20 Mar 2001 VOL 134 ISS 13  
FILE LAST UPDATED: 19 Mar 2001 (20010319/ED)

This file contains CAS Registry Numbers for easy and accurate substance identification.

This file supports REGISTRY for direct browsing and searching of all substance data from the REGISTRY file. Enter HELP FIRST for more information.

Now you can extend your author, patent assignee, patent information, and title searches back to 1907. The records from 1907-1966 now have this searchable data in CAOLD. You now have electronic access to all of CA: 1907 to 1966 in CAOLD and 1967 to the present in CAPLUS on STN.

The CA Lexicon is now available in the Controlled Term (/CT) field. Enter HELP LEXICON for full details.

Attention, the CA Lexicon is the copyrighted intellectual property of the American Chemical Society and is provided to assist you in searching databases on STN. Any dissemination, distribution, copying, or storing of this information, without the prior written consent of CAS, is strictly prohibited.

PI	US 6168936	B1	20010102	US 1999-401476	19990922
AB	<p>Disclosed herein are novel phenol oxidizing enzymes naturally-produced by strains of the species <i>Stachybotrys</i> which possess a pH optima in the alk. range and which are useful in modifying the color assocd. with dyes and colored compds., as well as in anti-dye transfer applications such as stain removers. Also disclosed herein are biol.-pure cultures of strains of the genus <i>Stachybotrys</i>, designated herein <b>Stachybotrys parvispora</b> MUCL 38996 and <i>Stachybotrys chartarum</i> MUCL 38898, which are capable of naturally-producing the novel phenol oxidizing enzymes. Disclosed herein is the amino acid and nucleic acid sequence for <i>Stachybotrys chartarum</i> phenol oxidase B as well as expression vectors and host cells comprising the nucleic acid. Disclosed herein are methods for producing the <b>phenol oxidizing enzyme</b> as well as methods for constructing expression hosts.</p>

AB Disclosed herein are phenol oxidizing enzymes obtainable from species of Stachybotrys which are useful in modifying the color assocd. with dyes and

colored compds., as well as in anti-dye transfer applications. Also disclosed herein are biol.-pure cultures of strains of the genus Stachybotrys, designated herein **Stachybotrys parvispora** MUCL 38996 and Stachybotrys chartarum MUCL 38898, which are capable of naturally-producing the novel phenol oxidizing enzymes. Disclosed herein is the amino acid and nucleic acid sequence for Stachybotrys phenol oxidizing enzymes as well as expression vectors and host cells comprising the nucleic acid. Disclosed herein are methods for producing the **phenol oxidizing enzyme** as well as methods for constructing expression hosts. Disclosed herein are enzyme compns. comprising phenol oxidizing enzymes obtainable from species of Stachybotrys. Based on their color-modifying ability, phenol-oxidizing enzymes of the present invention can be used, for example, for pulp and paper bleaching, for bleaching the color of stains on fabric, and for anti-dye transfer in detergent and textile applications.

AB	<p>Disclosed herein are novel phenol oxidizing enzymes naturally-produced by strains of the species Stachybotrys which possess a pH optima in the alk. range and which are useful in modifying the color assocd. with dyes and colored compds., as well as in anti-dye transfer applications such as stain removers. Also disclosed herein are biol.-pure cultures of strains of the genus Stachybotrys, designated herein <b>Stachybotrys parvispora</b> MUCL 38996 and Stachybotrys chartarum MUCL 38898, which are capable of naturally-producing the novel phenol oxidizing enzymes. Disclosed herein is the amino acid and nucleic acid sequence for Stachybotrys chartarum phenol oxidase B as well as expression vectors and host cells comprising the nucleic acid. Disclosed herein are methods for producing the <b>phenol oxidizing enzyme</b> as well as methods for constructing expression hosts.</p>
